

FOODS YOUR DOG SHOULDN'T EAT

(courtesy of WebMd Slideshow: Foods Your Dog Should Never Eat" February, 2016)

Note: this list appears to include foods dogs "shouldn't" eat vs. just foods that are truly toxic. I know pizza crust, for example, probably isn't good for dogs, but I also know a little won't poison them. If you're unsure, do more research, call your vet, or call ASPCA Animal Poison Control Center, 888-426-4435.

- Xylitol (an artificial sweetener)
- Avocado
- Alcohol
- Onions & Garlic
- Caffeine
- Grapes and Raisins
- Milk and other Dairy products
- Macadamia Nuts
- Chocolate
- Fat trimmings and cooked bones
- Persimmons, Peaches, Plums
- Raw eggs
- Raw meat and fish*
- Salt
- Sugary foods and drinks
- Yeast dough
- Human medicine
- Free access to the kitchen pantry**

**Because of salmonella risk? Not sure why this is on the list considering many dogs thrive on a raw diet, but I'm not a vet, so...*

***Yep. Probably not a good idea.*
